Honorable Dominick Graci, Chairman and Members of the Board of Supervisors St. Lucie West Services District 450 SW Utility Drive Port St. Lucie, FL 34986

RE: St. Lucie West Service District FY 2026 Proposed Annual Budget and FY 2026-2030 Capital Improvement Plan

Dear Honorable Chairman and Supervisors:

I am pleased to present the annual budget for FY 2026 and the FY 2026-2030 Capital Improvement Plan.

The attached budget addresses the operations and maintenance, debt service and capital improvement requirements for both the Utility operations, General, Capital Project and Debt Service Funds of the District.

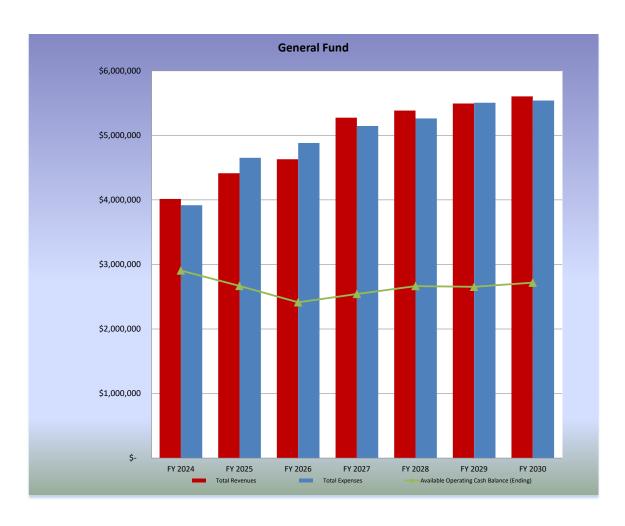

Many improvements were accomplished or encumbered in Fiscal Year 2025 and some of the major projects that were completed are:

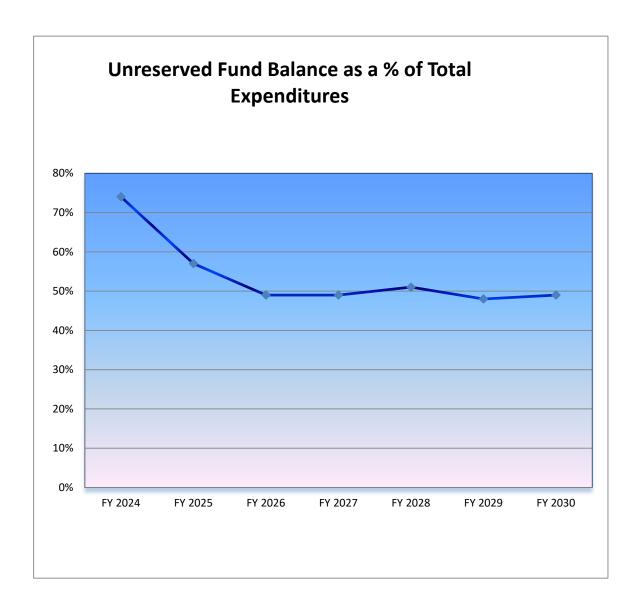

- Several lift stations will be rehabilitated for FY 2025. The lift station restoration project effort will be continued throughout the next several years to ensure that all lift stations are upgraded.
- ❖ The construction of the 4C gate was completed in early 2025.
- Stormwater pipelining and structure repairs will continue throughout the next several years.
- Continuing to work with the City of Port St. Lucie on the Lake Harvey Passive Park and use of the Landscaping Plan.
- ❖ Water Treatment Plant Redundancy Expansion has been funded through Utility Revenue Series 2024 Bonds which also refunded the Series 2011, 2013, and 2014 Bonds. Construction is expected to start in May 2025 and will be continued through FY2026.
- ❖ The AMI Meter Replacement Project started is expected to be completed in FY2025.

Fiscal Year 2026 reflects positive accountancy trends. The District has started raising the Utility Rates to accommodate inflationary needs in FY 2025 and the proposed budget reflects a **9.0%** rate increase for FY 2026 to accommodate the water treatment plant redundancy project. The Proposed Budget also includes a **\$30.00** increase in Maintenance Assessments for the FY 2026.

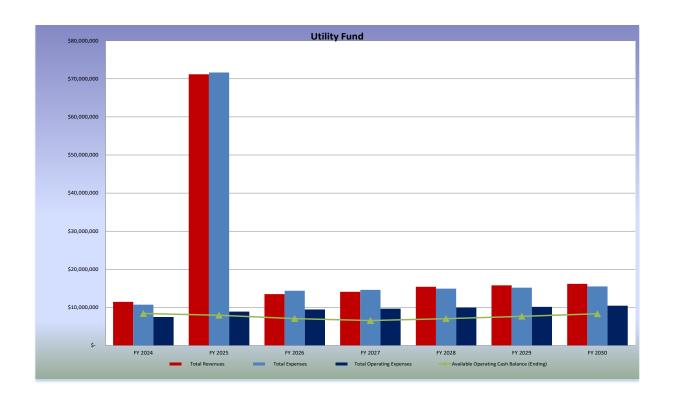

The budget for FY 2026 continues with a five-year forecast for the District's financial needs. Looking out over five years, rather than just the upcoming budget year, shows the impact of the immediate operating budget and the effect on the District's future fiscal health. Immediate decisions, such as whether to spend from our fund balance to pay for a project, can now be aided by a longer-term perspective.

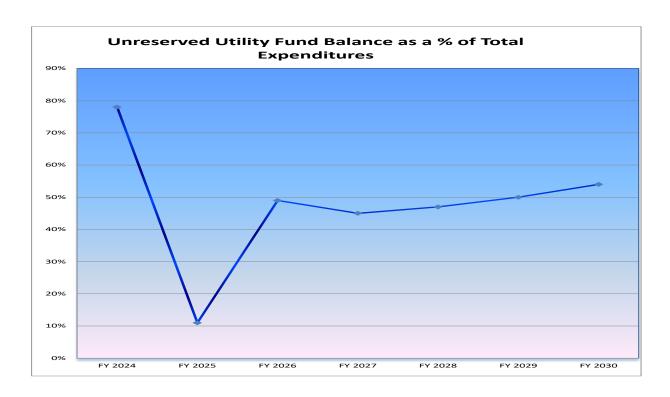

Trends in the General Fund revenues listed below depict expenditure and reserves in the top graph, while Unreserved Fund Balance, as a percentage, is depicted in the bottom graph.

Trends in the Utility Fund revenues listed below, depict expenditure and reserves in the top graph, while Unreserved Fund Balance, as a percentage, is depicted in the bottom graph.

The District has a five-year Utility and General Fund Capital Improvement Plan (CIP). By planning for capital needs over a five-year period the District will be able to see what the upcoming needs are, and what resources will be available to meet those needs. The Capital Improvement Plan (CIP) is broken down into four categories: the General Fund Renewal and Replacement Fund, Utility Renewal and Replacement Fund, Water Connection Fee Fund, and Wastewater Connection Fee Fund during the five-year period. You will find a brief description, cost breakdown and source of

funding for each of the projects identified in the FY 2026-2030 CIP Plan. The CIP worksheets contain projects that have been identified by the District office and Utility plant management teams. A significant number of these projects and related dollars have been identified as Utility Renewal & Replacement projects (approximately \$950,071 According to the Bond indenture, 5% of the previous year's revenues are required to be transferred to the R&R fund from the Revenue (operating) Fund to be spent for this purpose. Ultimately the additional funds requested come from the Utilities Revenue Fund. The Utility Renewal and Replacement Fund reflects a fund balance of \$291,980 for FY 2026. The General Fund Renewal and Replacement Fund reflects \$275,484 in Stormwater improvement projects with a fund balance of \$493,841.

We are currently in the process of completing a Revenue Sufficiency Analysis. This study is very important to aid in the adoption of rate increases in the upcoming years. To be able to continue with the CIP effort, the District's Utility system may need to provide additional revenues to fund future projects.

The staff are currently investigating the need to expand the Water Treatment Plant to accommodate the current building boom and meet the demands of our residents.

I believe the Department Heads and Staff have tried to address the concerns of the Board and have been diligent in keeping expenditure down while providing quality service to the residents throughout the year. I would like to thank the Staff for all their hard work in addressing these major issues.

We respectfully submit the FY 2026 budget for your review and consideration.

Sincerely,

Joshua C Miller

District Manager

ST. LUCIE WEST SERVICES DISTRICT GENERAL FUND BUDGET OVERVIEW

Budget Discussion

The budget is an annual process that involves the Board of Supervisors, the District Manager and staff, operations and billing personnel, engineers, and others. This process must first consider the anticipated revenues we will receive from operations to determine the resources available to be budgeted. The first claim on the resources will be the essential costs necessary for the proper operation and maintenance of the general fund operations. Any remaining funds may then be utilized for the capital improvement program and remaining needs.

In the Governmental Funds, separate accounting funds are set up for the bonded debt service and proceeds from bond issues. There are two such funds at St. Lucie West Services District. These two funds are shown on the last three pages of this budget. Separate assessments of the District property owners are assigned exclusively for the Water Management Benefit Series 2013 and the Storm Water ditch repair next to the Post Office. The proceeds of these assessments can be used for no other purpose than the debt service of these two bond issues.

We have divided the general fund budget into two parts: the operating budget and the capital budget.

The capital budget is for infrastructure improvements, system expansion to handle customer growth, renewal and replacements, service extensions, additions, and extraordinary repairs. The addition of a Renewal and Replacement Fund will be utilized to fund these projects.

We are budgeting for a deficit in FY 2026 due in part to Capital Outlay purchases and transfer to R&R Fund for stormwater repairs. The General Fund for both FY 2025 and 2026 will have a fund balance exceeding \$2,500,000. This means that the District will have sufficient cash flow to carry operating costs until the General Fund starts receiving revenue from the maintenance assessments in November and the Storm Water Fees from the City of Port St. Lucie in January.

Certain decisions, especially in the capital improvement program, made during the budget process have an impact which extends to multiple fiscal years and not only the year for which the budget is approved. To demonstrate this impact, five (5) year forecasts have been developed for each system for both the operating and capital budgets.

Assumptions Used in Preparing the Budget

Inflation – The following inflationary rates are utilized; for the regular salaries line item the rate increased to 3.0% for FY 2026 and was based upon the change in the U.S. Bureau of Labor Statistics Consumer Price Index - All Urban Customers, U.S. City Average, Services, for most other line items, where applicable, a general inflationary rate of 2% is utilized. There are some exceptions such as health insurance and liability insurance, for which national projections call for continuing increases. Energy costs are expected to grow at an inflation rate of approximately 19.0% for FY 2026 as well.

Rate Adjustment – The Special Assessment rate of \$206.00 per ERU proposed in the budget for FY 2026 reflects a \$30.00 per ERU increase over the FY 2025 Budget.

The ERU numbers are expected to remain the same in FY 2026. We expect revenues in most categories to remain the same per year for each of the next five years. Fiscal years 2027 would reflect a \$60.00 increase in assessments per ERU. As a result, Fiscal years 2028,2029,2030 and possibly 2031 may only have a \$10.00 increase in assessments per ERU.

Capital Improvement Program

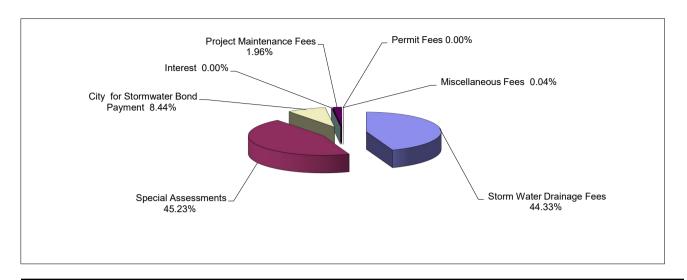

The capital improvement program has several items for your review. In a continuation of the previous year's funding practices for capital items, we are proposing to pay for the capital items directly rather than financing the purchase over several years. The typical interest rates charged for lease financing are significant, and therefore the District can save a significant amount by purchasing the items. All equipment purchase will be paid for outright at the time of purchase.

A summary of the funding sources for all system capital projects budgeted in FY 2026 are as follows: The Aquatics Division is not requesting any capital expenditures this FY. The Administration Division is not requesting any capital expenditure this FY. The Exotic Plant Removal Division reflects \$15,000 for a Kawasaki mule. The Stormwater Division reflects \$45,000 for a Ford Ranger, \$18,000 for a zero-turn mower, \$50,000 for a Front end loader which is to be split 50-50 with the Utility department. The Shop Division is requesting \$7,500 for a tire machine. The total capital request for the General Fund for FY 2026 is \$135,500.

The General Fund Renewal and Replacement Fund Project is for emergency storm water projects in the amount of \$275,484. The total will leave an R&R Fund balance of \$499,191.

ST. LUCIE WEST SERVICES DISTRICT

WATER AND SEWER FUND BUDGET OVERVIEW

Budget Discussion

The budget is an annual process that involves the Board of Supervisors, District Manager and staff, operations and billing personnel, engineers, rate consultant and others. This process must first consider anticipated revenues we will receive from operations to determine the resources available to be budgeted. First claim on the resources will be the essential costs necessary for the proper operation and maintenance of the utility operations. The next priority must be to fund those areas necessary to satisfy the requirements of the revenue bonds issued to build and improve the water and sewer systems. Any remaining funds may then be utilized for the capital improvement program and remaining needs.

We have divided the budget into two parts: the Operating Budget, which includes the Debt Service requirements and the Capital Improvement Budget. The Operating Budget includes routine operating expenditures. The Capital Budget is for infrastructure improvements, system expansion to handle customer growth, renewal and replacements, service extensions and additions or extraordinary repairs.

Certain decisions, especially in the capital improvement program, made during the budget process have an impact that extends to multiple fiscal years and not only the year in which the Board approves the budget. To demonstrate this impact, we have developed five (5) year forecasts for both the operating and capital budgets.

We anticipate finishing FY 2025 with a deficit due in part to the elevated costs with inflation and increased costs due to availability and the addition of four more employees, a Public Information Officer, Utilities Field Inspector, and two more Underground Utilities Service Workers. The Proposed Budget for FY 2026 reflects a 9.0% Rate Increase.

Assumptions Used in Preparing the Budget

Inflation – The following inflationary rates are utilized; for the regular salaries line item the rate increased to 3.0% for FY 2025 and was based upon the change in the U.S. Bureau of Labor Statistics Consumer Price Index - All Urban Customers, U.S. City Average, Services, for most other line items, where applicable, a general inflationary rate of 2% is utilized. There are some exceptions such as health insurance 8% this year, and liability insurance 10% this year for which national projections call for continuing increases. Energy costs are expected to grow at an inflation rate of 19.07% as well.

<u>Rate Adjustment</u> – There is a 9.0 % rate increase planned for FY 2026 in this budget based on the current factors. The Rate Stabilization Fund balance has been growing due to interest and may grow throughout FY26. This Fund is currently at \$651,492 for FY2026.

Operating Improvements

This budget includes a few small dollar cost improvements. We are continuing the funding of the water conservation effort with customers by providing rebate on items such as low flow toilets and low flow shower heads. This program will be funded at an annual amount of \$12,000 and is designed to encourage water conservation.

We are also taking efforts to improve customer service and billing for the utility, an item in the District's Strategic Plan. The District will continue to conduct training sessions for customer service.

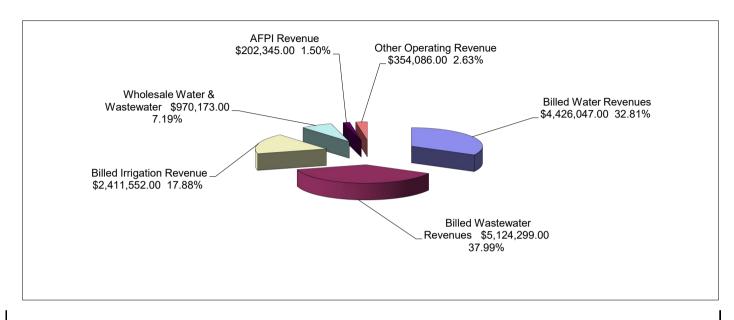

Capital Improvement Program

The capital improvement program has several items for your review, a total cost in FY 2026 of \$27,529,442. In a continuation of a change started in FY 2006, we propose to continue to pay for the capital items directly rather than financing the purchase over several years. Included in this amount are Series 2024 UT revenue Bonds for Water Treatment Improvements, the typical interest rates charged for lease financing are significant, and therefore the District can save a significant amount by purchasing these items rather than leasing them. The Renewal and Replacement Fund Budget is \$950,071; the Water Connection Fee Budget is \$0; the Wastewater Connection Fee Budget is \$0, and the Capital Outlay Budget is \$242,000 for FY 2026.

Major capital projects contained in the capital budget for FY 2026 include the Water Treatment Improvement Project at \$26,000.000, the continuation of the Lift Station Renewal and Replacement project at \$318,991, and the Emergency Renewal and Replacement Projects at \$280,000. The Capital Outlay Budget for the Utility Fund proposes the replacement of vehicles and equipment totaling \$242,000.

This includes project maintenance fees associated with lawn maintenance for the Utilities Division paid to the General Fund.

Contingency

This code was recommended by the Rate Consultant for unexpected expenses. This is 1.5% of the operating expenses minus the Capital Outlay.

Electricity Services

This description is the same for all Division in the Utilities Department: Includes electricity charges for the administration building which is split with the General Fund.

Water & Sewer Administration Division - Capital Outlay

Equipment

This description is the same for all Divisions in the Utilities Department: No expenditures are planned for this fiscal year.

Building

This description is the same for all Division in the Utilities Department: Admin has requested \$5,000 for the new storage building interior work. This will allow for all public records management to stay onsite in lieu of using a remote storage facility.

Other

This description is the same for all Division in the Utilities Department: This code is for any other Capital purchases over \$1,000. No expenditures planned for this fiscal year.

WATER TREATMENT PLANT DIVISION

Water Treatment Plant Division - Personnel

Regular Salaries; Overtime; FICA; Retirement Contributions; Uniforms; Training & Education Expenses; Annual PTO and Cell Stipend
The above categories are the same as described in the Administration.

Water Treatment Plant Division - Operating

Other Contractual Services; Operating Supplies; Electricity Services.

The above categories are the same as described in the Administration Budget

Operations & Maintenance Services

Charges for repairs on water treatment plant pipes and pump maintenance.

Laboratory Services

Includes charges for the water treatment plant laboratory testing, injection well testing, lead & copper testing, and others as required by permits.

Plant Maintenance

This line captures charges for normal maintenance for the water treatment plant. By performing normal maintenance inline with maintenance schedules, it provides a longer useful life for the utility plant assets.

Chemicals

This line includes any chemical purchases for the water treatment plant.

Water Conservation Grant Program

This line includes the allotment of rebate credits on utility bills on items such as low flow toilets and low flow shower heads. This program is designed to encourage water conservation.

Backflow Prevention Program

This line is for water backflow prevention testing performed by contractors who have been preapproved for this program and will assist in 100% compliance to the rule.

Water Treatment Plant Division - Capital Outlay
