**RE: PRECAUTIONARY BOIL WATER NOTICE "B4" WATER MAIN BREAK/
INTERRUPTION**

LOCATION AFFECTED: 1100 – 1152 NW Lombardy Dr

To Whom It May Concern:

On Thursday, October 9, 2025, at approximately 4:00PM St. Lucie West Services District experienced a Potable Water Distribution System Main Break Event. During this event, potable water pressure dropped below 20PSI. The drop in water pressure was caused by a line break.

SLWSD is issuing a Precautionary Boil Water Notice beginning immediately. This simply means that all water used for drinking, cooking, making ice, brushing teeth or washing dishes should be boiled. A rolling boil of one minute is enough. This is a precautionary measure.

The utility will be flushing the system, sampling and testing shall be performed to ensure all drinking water standards are met and that the water is bacteriologically safe.

The District will send a Rescission of this Precautionary Boil Water Notice upon the receipt of satisfactory testing results.

Please report this event in your news coverage.

Feel free to contact me if you have any questions about this event.

Sincerely,

Joshua Miller, District Manager
